XPONENTIAL EUROPE

EUROPEAN DRONE FORUM | MARCH 15, 2027
EXHIBITION & CONFERENCE | MARCH 16-18, 2027
DÜSSELDORF, GERMANY

DEFENCE

Counter-UAS Needs New Perspectives.

Counter-UAS has long been more than a purely military topic. Protection against uncrewed systems is becoming more important across an increasing number of use cases, including critical infrastructure and security-relevant applications.

Civil. Defense. Connected.

Civil Security

- Critical infrastructure
- Airports, ports and transport
- Industrial and sensitive sites
- Police and public safety
- Events and public spaces

Defense and National Security

- Military infrastructure
- Protection of deployed forces
- Protection of sites and logistics
- Border and airspace protection
- National security authorities

Because Counter-UAS needs connected thinking.

All Domains in One Place

Air, land, water, space, defense and cyber all play a role in protecting against drone threats.

Technologies Working Together

Sensors, AI, navigation and cybersecurity form the building blocks of modern Counter-UAS solutions.

Dual-Use Perspectives

Critical infrastructure protection and defense bring together civilian and military requirements.

Live Demonstrations

Present your solutions to a live audience and gain additional visibility.

Giving Counter-UAS a Clear Platform.

Counter-UAS is an integral part of XPONENTIAL Europe, with the **German Drone-Defence & Innovation Forum** and the **Bundeswehr Innovation Center** as a partner providing additional expert visibility.

BUNDESWEHR INNOVATION CENTER
